Equations [Subheading: Times New Roman 10, Justify]

Number equations consecutively. Equation numbers, within parentheses, are to position flush right, as in (1), using a right tab stop. To make your equations more compact, you may use the solidus (/), the exp function, or appropriate exponents. Italicize Roman symbols for quantities and variables, but not Greek symbols. Use a long dash rather than a hyphen for a minus sign.

$$a^2 + b^2 = c^2 \tag{1}$$

Be sure that the symbols in your equation have been defined before or immediately following the equation. Use "(1)", not "Eq. (1)" or "equation (1)", except at the beginning of a sentence: "Equation (1) is . . ." *[Times New Roman 10, Justify]*

2.1 Abbreviations and Acronyms

Define abbreviations and acronyms the first time they are used in the text. Do not use abbreviations in the title or sections unless they are unavoidable.

2.1.1 Headings and Sub-Headings

Kindly use the following style for headings and subheadings.

The caption for a figure appears below the figure; for a table, above. Do not be afraid to use lengthy figure and table captions better than confusing or incomplete ones.

If your figure or table is essentially the same as or based on another author's, but you recreated or adapted it, in this case provide proper citation of the source. The most logical place for the citation to appear is at the end of the caption.
